

# OT Security & Resilience

Protecting what powers  
a **smarter, safer** future.

Threat  
Visibility

Asset  
Exposure

Incident  
Readiness

Secure-by-  
Design

# What we do

Protect industrial operations, strengthen resilience and ensure business continuity.

## Threat Visibility

Gain clear visibility across OT assets, networks and risks.

## Risk Management

Identify, assess and prioritise risks to reduce impact and strengthen defences.

## Resilience & Response

Prepare, detect and respond rapidly to minimise disruption and downtime.

## Secure Operations

Embed security into OT processes and systems for continuous protection.

# Who we help

## Industrial Organisations

Protect critical operations and ensure safe, secure performance.

## Infrastructure Operators

Strengthen resilience across complex OT environments.

## Public Sector & Essential Services

Safeguard communities and essential services from disruption.

# Key Solutions & Focus Areas

Protect operational technology environments,  
strengthen resilience and support safer industrial transformation.

## OT Cyber Risk & Resilience Assessments

Identify, quantify and prioritise risks across people, processes, technology and assets.

## Asset Visibility & Exposure Monitoring

Gain continuous visibility across OT assets, networks and exposures to support stronger security decisions.

## Industrial Incident Preparedness

Build readiness to detect, respond and recover from OT cyber incidents with confidence.

## Secure-by-Design Smart Infrastructure

Embed security into connected infrastructure from the outset to support resilient operations.

## Who we help

### Industrial Organisations

Protect critical operations and strengthen secure performance.

### Infrastructure Operators

Improve resilience across complex OT and industrial environments.

### Public Sector & Essential Services

Safeguard essential services and communities from disruption.

# Your OT Security & Resilience Journey

A proven 4-step journey to strengthen resilience, reduce risk and protect what matters most.

### Stronger Together

We work as an extension of your team, bringing people, processes and technology together to build a resilient OT future.

Expert OT Security Team

Proven Methodology

Industry-Leading Technology

Measurable Outcomes

# SmartX360 Threat Pulse

Real-time global threat visibility for operational technology.  
Detect faster. Respond smarter. Stay resilient.

## Global Threat Visibility

Continuous monitoring of OT threat activity worldwide across sectors and regions.

## Critical Alerting

Real-time, contextual alerts for high-impact threats and anomalous OT behavior.

## Sector Exposure

Understand which sectors and regions are most targeted right now.

## Actionable Intelligence

Curated threat insights and recommendations to guide faster, confident decisions.

## OT Threat Monitoring

Continuous monitoring of industrial networks, assets and protocols.

## Live Operations Dashboard

Real-time situational awareness with interactive maps and threat metrics.

## Threat Intelligence Feed

Curated global OT threat intelligence integrated into your security stack.

## What it helps you do

## OT & Security Operations Teams

Detect and prioritise threats impacting industrial environments in real time.

## Infrastructure Owners

Strengthen situational awareness and protect critical operations.

## Essential Services Providers

Enhance resilience and continuity across critical service delivery.

# Why Smart Net Zero

Why organisations choose us for  
OT Security & Resilience.

01

## OT expertise

Deep understanding of critical infrastructure, industrial environments and connected operational technology.

02

## Security with resilience

We reduce cyber risk while strengthening operational continuity, safety and recovery readiness.

03

## Practical delivery

From assessment to roadmap, implementation support and monitoring, we focus on outcomes that work in the real world.

04

## Innovation-led

We combine advisory expertise, threat intelligence and smart infrastructure insight to help shape more secure future operations.

**Trusted to deliver**

Critical infrastructure focus

Risk-led approach

Business continuity aligned

Future-ready security

Helping organisations protect critical operations and build **secure, resilient smart infrastructure.**

**SAFE.  
SUSTAINABLE.  
SECURE.**
